

Where can I make
the right start to a
successful career?

Dare to ask. Apply now!

Siemens is a global powerhouse in electronics and electrical engineering, actively operating in more than 190 countries. We're offering a wide range of pioneering products for energy efficiency, industrial productivity, affordable healthcare and intelligent infrastructure, with a quickly growing focus on sustainability. To find answers to the toughest questions of our time, we need open-minded and curious people who dare to ask them. Just like the more than 405,000 people of Siemens. And maybe just like you.

We are looking for **university graduates** for inclusion in our group-wide

Siemens Graduate Program China

What does the Siemens Graduate Program offer me?

The Siemens Graduate Program (SGP) offers you the ideal start to your career – your opportunity to prepare yourself for a successful career at Siemens. Designed as an intensive and internationally oriented two-year program, the SGP will prepare you for future leadership tasks, offering both flexibility and diverse work experiences. The program, which enables you to actively integrate your interests and your qualifications, consists of three challenging eight-month assignments, during which you'll be familiarized with at least two functional areas in one of our Sectors. One of these three assignments will take place abroad at one of our 1,700 international business locations. On this international rotation you'll learn about the local business and culture while taking on various responsibilities and project work. You will also receive an intensive training program and the opportunity for personal development. A personal mentor will be at your side for the duration of the program, helping you to achieve your various objectives while promoting your development and assisting you in planning your career.

What do I need to qualify for this program?

- Master or comparable degree completed with above-average grades, also PHD candidates are welcome
- Completion of a course of study in engineering, for example, with a focus on electrical or mechanical engineering
- Significant experience of a foreign-speaking culture by way of an extended stay abroad
- Fluency in English and Chinese (Mandarin); knowledge of further languages is welcome
- Open-minded, highly motivated and ready to take on challenges
- Flexible, mobile and interested in working in an international and constantly changing work environment

How do I apply?

We are looking for university graduates with excellent qualifications interested in helping us shape the future of our company – individuals who are interested in making a difference in the world. If you have finished your studies either within the last year or are going to do so in the next few months, and meet our requirements, then we would be pleased to get to know you.

Please submit your online application via our website: bit.ly/SiemensChina or www.careersinternational.com/jobs
