IT Forensic Specialist
at the Fraud Investigation & Dispute Services Group

We are looking for candidates in our Forensic Technology & Discovery Services (FTDS) team which is part of the Fraud Investigation & Dispute Services business unit.

What would you do?

As part of our FTDS team based in Budapest, Hungary your work may cover local or international fraud investigations, data analysis, advisory and transaction dispute advisory. As well as working on client projects, other activities in which you may get involved include: researching companies, industries or individuals using internet tools and publicly available information; marketing research; and business development projects.

What do we do?

Our practice helps clients identify and analyze vulnerabilities in order to manage and mitigate our client's risk. Our skills in forensic analysis allow our clients to continue their business, drive investigations, recover lost funds, halt further economic losses, and mitigate fraud risk. We also assist our clients with anti-fraud, compliance, anti-money laundering (AML) and risk-management technology.

The role will be based in our **Budapest office with possible short-term assignments abroad.**

Who are we looking for?

The ideal candidate has the following skills:
- 0-5 years of relevant work experience
- Degree in Computer Science or in Economics
- Fluent in English (additional language skill is an advantage)
- Native Hungarian speaking is an advantage
- Intellectually rigorous, with strong analytical skills and creativity
- Flexible and mobile, prepared to work on both national and international assignments even on a short notice.
- Knowledge and experience in the following tools is an advantage: MS SQL, SPSS, Tableau, Spotfire.
